

Netflix Content Library Analysis: Trends, Ratings & Genre Performance

Total Content

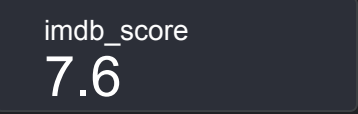

Total movies

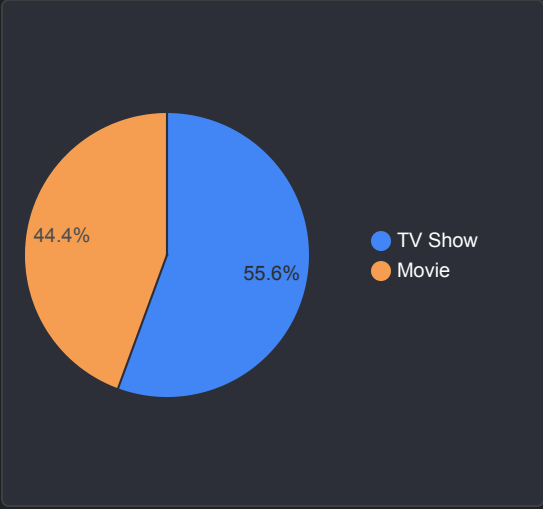

Total TV shows

AVG imdb_score

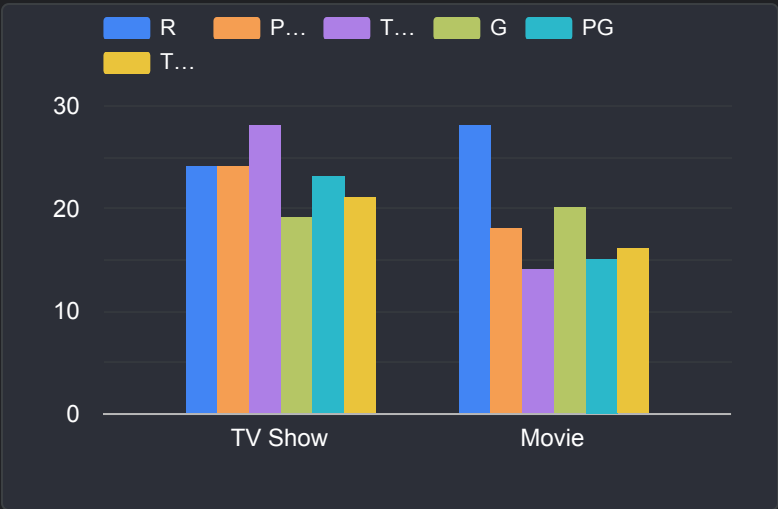

Movies vs TV shows

Insight: TV shows represent the majority of Netflix's content library.

Recommendation: Continue investing in original TV shows while expanding high-performing movies and documentaries

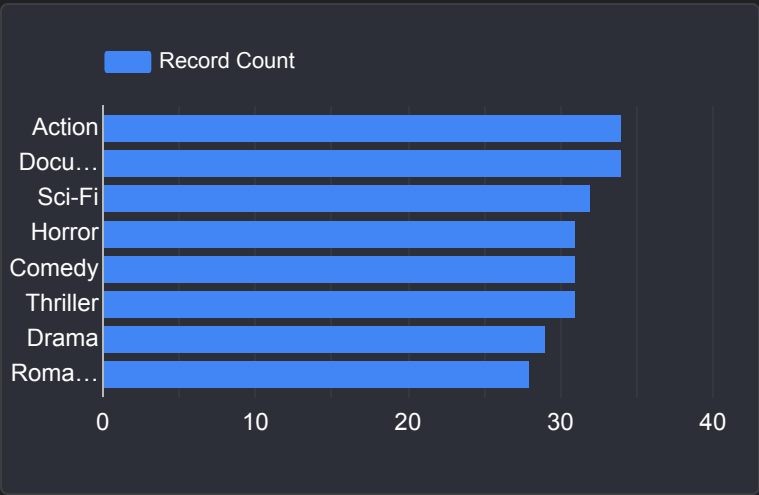

Content Ratings

Insights: TV-MA in TV shows and R in Movies have the highest rating, indicating a strong focus on mature audiences.

Recommendations: Expand family-friendly content to reach a broader viewer base.

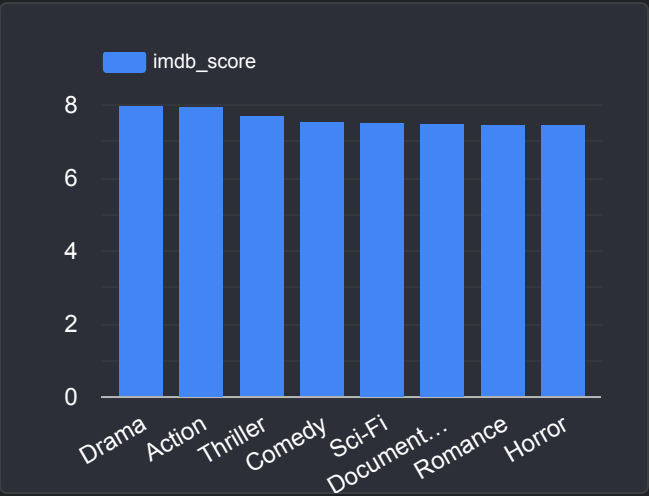

Top most genres

Insights: Action and documentaries are the most common genres.

Recommendations: Focus on popular genres while exploring niche categories to attract new audiences.

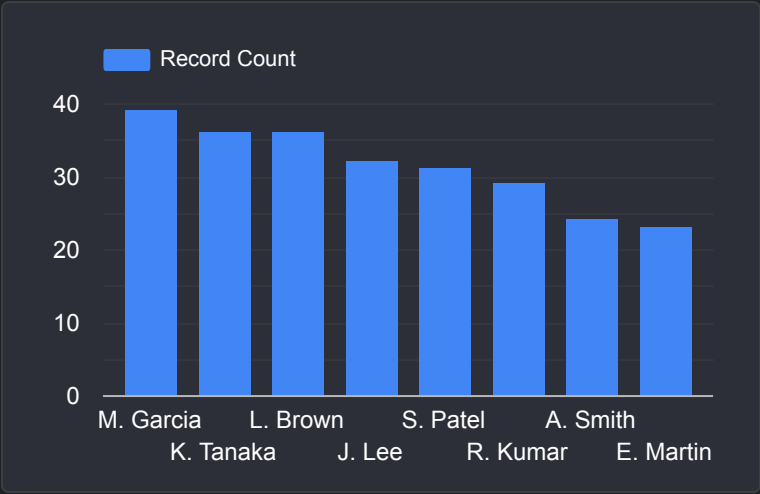

AVG imdb score by Genre

Insights: Drama and Action top the list and provide a good IMDb score.

Recommendations: Prioritise investment in highly rated genres to improve audience satisfaction.

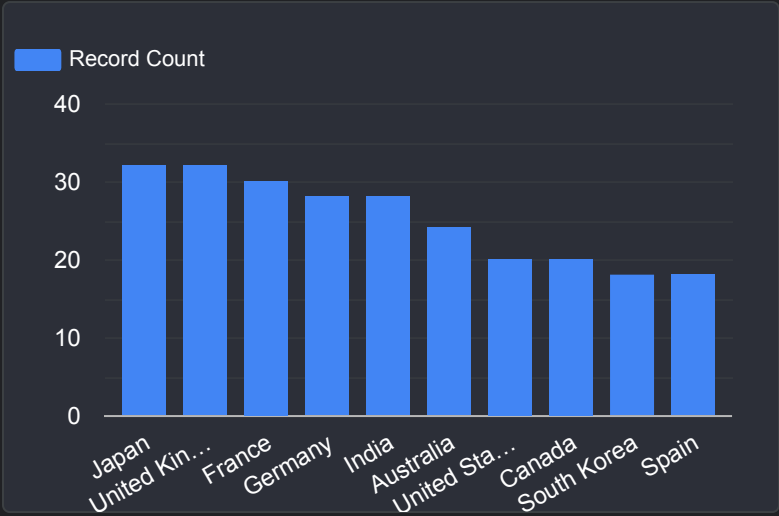

Record Count by director

Insights: A small number of directors contribute multiple titles.

Recommendations: Strengthen partnerships with successful directors while identifying new creative talent.

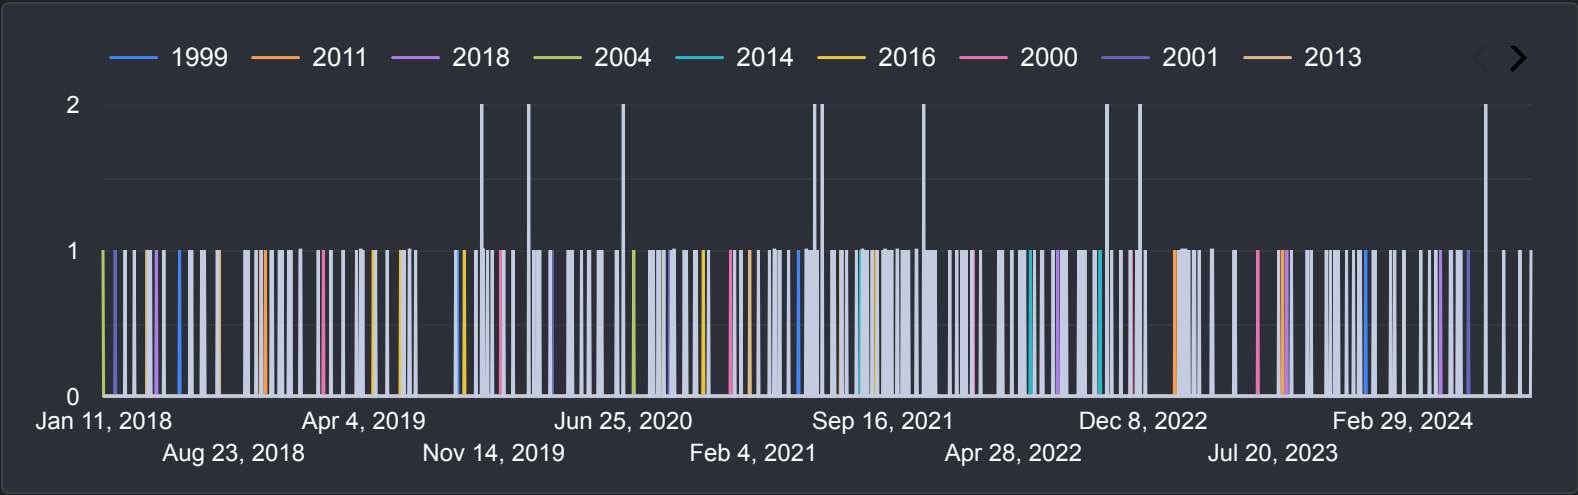

Top most countries that create netflix content

Insight: Japan contributes the highest number of titles.

Recommendation: Increase content acquisition from emerging markets to diversify the catalogue.

How netflix content changed overtime

Insights: Content production has increased significantly in recent years.

Recommendations: Maintain a balanced content acquisition strategy to support long-term growth.
